

Tetrosyl

Tetroseal Underbody Sealant

Marketing Bulletin

High solid, highly structured, bituminous-based underbody sealing compound. Protects vehicles against corrosion, rust stones, salt and water extending the life of covered elements. Its low shear rheology makes it particularly suitable where resistance to sagging after application is required.

Advantages:

- Suitable for use on sills and all lower body panels requiring enhanced protection.
- Provides rust protection.
- Provides excellent sound deadening qualities.
